

QA-18866 + QA-40815 — Mixpanel cases

Status: **BLOCKED ON ACCESS** — neither case executed **Run date:** 2026-05-13 · **App:** Mixpanel Dev (mixpanel.com/project/1485629) **User:** lfiqa@listenfirstmedia.com (LFQA)

What happened

Navigated to the case-specified Mixpanel URLs: - <https://mixpanel.com/project/1485629/view/35285/app/insights#VrFYpPvux7wA> (QA-18866) - <https://mixpanel.com/project/1485629/view/35285/app/boards?id=5253657> (QA-40815)

Mixpanel responded with **"You need permission — It looks like you want to view a report, but either don't have access or aren't logged in"**, redirecting to mixpanel.com/request_access.

The LFIQA Google account does not have membership in the Mixpanel Dev project (1485629). Neither case could be executed.

Steps not executed

All steps in both cases require the Insights / Boards UI inside the project, which is gated behind Mixpanel project membership.

Assertions not verified

Case	Assertions	Status
QA-18866 A1-A6 (no Undefined/Null/Empty in Name/Status/Email/Customer/Subscriber/BusinessUnit columns)	6	All
QA-40815 (no Null/Not set/Undefined/Anomaly across 13 events + Tile Order Property format)	13+1	All

What unblocks these cases

Add LFIQA as a member to Mixpanel Dev project 1485629 (with read access to Insights and Boards). Once granted, re-run.

Alternative: a teammate with existing access runs both cases manually and pastes assertion outcomes; we update the reports.
